RACE-PROVEN FASTENERS

**PAGE 2: INSTALLATION ON '98.5-'19 CUMMINS 24V 5.9L/6.7L - PART #TTC98519HS06**

**Note:** It will be necessary to machine the lower rocker arm cover at the #24 bolt hole location in the torque sequence to facilitate installation of the lower rocker arm cover (see illustrations below).

**Remove material as necessary to allow clearance for the stud, nut and washer.**

**Finished machining should allow easy removal and installation of the head stud.**
